## Photo Rag® Baryta

315 gsm, 100% Cotton, white, high-gloss

### Product Description

Photo Rag® Baryta consists of 100% cotton and offers the unique “touch and feel” experience of Hahnemühle’s genuine art papers.

Using barium sulphate in the inkjet coating ensures the typical gloss that makes this paper a genuine replacement for traditional Baryta papers from analogue laboratories. Its premium formulation allows for a large colour gamut with high image definition and 3-dimensional colour depth.

### Applications and Characteristics

The paper’s unique glossy, baryta surface and white tone lends itself perfectly to black and white prints with an extremely high dmax and finest grey tones as well as lustre colour images. Its premium inkjet coating also offers a very high level of water resistance.

### Physical Characteristics

	Unity	Valuation	Test Norm / Notes
Test Conditions			23°C / 50% R.H.
Grammage	gsm	315	EN ISO 536
Thickness	mm	0,39	EN 20 534
Whiteness	%	91,0	ISO 11475
Gloss	%	21,0	EN ISO 2813
Media Colour		white	not bleached
pH-Value total		8,0	DIN 53124
Ink-Limit	%	280	
Water resistance		high	
Special features	no optical brighteners, barium sulphate		

All indicated data to be understood as typical average values.

### Conditions of use and storage

Use and store ideally at a relative humidity of 35 to 65% and a temperature of 10 to 30° C (50° – 86°F). All recommendations and product indications are for your guidance, and are subject to our test criteria, which remain subject to change without prior notice. The consistency of results is not guaranteed.

Use care in handling printed material, surface susceptible to abrasion.

Store papers in archive quality envelopes, folders, and boxes.

Use only archive grade tapes and glues for mounting & framing.
